EXPERIENCE

Accenture (Client: American Express)

Gurugram, Oct'22– Present

Senior Software Developer (Promoted)

June'25– Present

- Led and delivered distributed microservices architecture using **Spring Boot, Kafka, and Spring Batch**, enabling **800k+ transactions per hour** for regulatory audit processing and fault-tolerant recovery.
- Deployed secure document management workflows using **AWS (S3, SSE-KMS encryption, IAM, and pre-signed URLs)** with lifecycle policies to Glacier, improving storage efficiency and reducing long-term cost.
- Architected centralized logging with ELK Stack and Kafka, **reducing production incidents by 40%**.
- Mentored 5 engineers** on OOP, SOLID principles, TDD, and design patterns, enhancing delivery quality and velocity.

Software Developer

Oct'22– May'25

- Delivered RESTful APIs using **Java, Spring Boot, Hibernate, DynamoDB, MySQL, AWS**, achieving **95%+** unit and functional test coverage and supporting **50K+** requests/sec.
- Enhanced backend performance optimization by applying Redis caching and Hibernate tuning, improving **API latency from 150ms to 20ms** under high-load conditions.
- Standardized a **Jenkins Shared Library CI/CD pipeline** across 50+ repositories, accelerating release cycles.
- Architected critical Maker-Checker workflows by implementing **JWT** and **RBAC** with 100% auditability and compliance.
- Built reusable backend and frontend libraries in **Java, JavaScript, and ReactJS**, adopted across 70+ repositories to streamline cross-team collaboration.

Addverb

Noida, Jan'22– June'22

Full Stack Developer Intern

- Built an inventory tracking platform using **Spring Boot + React.js**, enhancing responsiveness and maintainability.
- Designed RESTful APIs integrated with **Kafka** for real-time data synchronization between distributed services.
- Deployed application modules on **AWS (EC2, S3)**, ensuring scalability and high availability.

SKILLS

- Backend:** Java, Spring, Spring Boot, Spring Batch, Spring Security, JDBC, Hibernate, JPA, Node.js, Kafka, Redis
- Cloud & DevOps:** AWS, Docker, Kubernetes, Git, Jenkins
- Databases:** SQL (Oracle, PostgreSQL, MySQL), NoSQL (MongoDB)
- Frontend:** JavaScript, ReactJS, HTML, CSS
- Testing:** Postman, Swagger, Sonar, JUnit
- Core Concepts:** Data Structures and Algorithms, Object Oriented Programming

PROJECTS

[Api Rate Limiter](#)

May'25 – July'25

- Developed an API rate-limiting library with **Spring Boot, JWT and Redis**, enabling dynamic tier-based throttling.
- Built concurrency-safe algorithms, performance monitoring with **Apache JMeter** at **1,000+ requests/sec**, achieving **~30–50ms latency** and **APDEX 1.0** for production-grade scalability.

ACHIEVEMENTS & ACTIVITIES

- Solved **200+ algorithmic problems** on [Leetcode](#).
- [Skills Star Award](#), **Accenture** - Honored for **leadership** in designing highly scalable distributed systems.
- [Technical Blogging](#) - Authored articles on Java, Spring Framework, microservices architecture, and DevOps.

EDUCATION

Thapar Institute of Engineering and Technology - Bachelor of Engineering, Mechatronics

June, 2022

Thapar Polytechnic College - Diploma, Mechanical

June, 2019

CERTIFICATION

- AWS Certified Developer – Associate** (Expected By Dec 2025)
