WORK EXPERIENCE

Accenture (Client: Bank of America)

Gurugram, Haryana

Senior Software Developer (Promoted)

June 2025 – Present

- Architected and deployed high-throughput **distributed batch systems** via **Kafka and Spring Batch**, processing **3M+ transactions/hr with 99.9% reliability** for regulatory audits and fault-tolerant recovery.
- Engineered a secure **AWS data pipeline** using S3, KMS, and IAM; implemented a **Glacier-tier archival strategy** that slashed long-term data retention costs by **35%**.
- Designed centralized **logging and observability system using ELK Stack** (Elasticsearch, Logstash, Kibana), enabling proactive alerting and root-cause analysis that **reduced production incidents by 40%**.
- **Mentored 5 engineers** on OOP, SOLID, TDD, design patterns and code quality, boosted feature delivery velocity by **25%**.
- **Owned end-to-end software life cycle** for critical services, maintaining **95%+ unit test coverage**, coding standards, production deployment, debugging and ensuring cross-functional stakeholder collaboration.

Software Developer

Oct 2022 – May 2025

- Delivered **RESTful APIs in microservice architecture** using Java, Spring Boot, Hibernate, MongoDB, PostgreSQL, AWS, **scaled up to 100K+ requests/sec** during peak hours.
- Troubleshoot severe **P99 latency issues and N+1 query bottlenecks (150ms to 20ms reduction)** by profiling production traffic, implementing a **multi-level caching strategy** with Redis and Hibernate L2 cache for high-traffic endpoints.
- Developed asynchronous, scalable multi-threaded systems using **Java 21 Virtual Threads**; boosting concurrency by **300%** while optimizing memory utilization.
- Automated Jenkins **CI/CD pipeline used across 50+ repositories**, accelerating release cycles by **80%**.
- Built enterprise-grade Maker-Checker workflows using **JWT and RBAC with 100% auditability** and reliability.

Addverb

Noida, Uttar Pradesh

Full Stack Developer Intern

Jan 2022 – June 2022

- Built an inventory tracking system using **Spring Boot + React**, managing 10 million units/day per plant.
- Designed **RESTful APIs integrated with Kafka** enabling real-time data synchronization across distributed services.
- Deployed application modules on **AWS (EC2, S3)**, ensuring scalability and high availability.

SKILLS

Languages & Frameworks: J2EE, Java 8+, JavaScript, Spring, Spring Boot, Spring Batch, Hibernate, JPA, Maven

Cloud & DevOps: AWS, Docker, Kubernetes, Jenkins, Git/GitHub, ELK Stack, Kafka, Redis

Databases & Testing: SQL (Oracle, PostgreSQL, MySQL), NoSQL (MongoDB), JUnit5, Mockito, SonarQube, Postman

Frontend: ReactJS, HTML, CSS, Bootstrap

Core Competencies: Data Structures & Algorithms, System Design, Concurrency, Distributed Systems, OOP, RDBMS

PROJECTS

API Rate Limiter | Java, Spring Boot, Redis | [GitHub](#)

May 2025 – July 2025

- Designed and implemented a **distributed API rate-limiting** library using Spring Boot and Redis, supporting **dynamic tier-based throttling and JWT-based authentication**.
- Implemented **concurrency-safe algorithms** validated under **1K+ requests/sec** load via JMeter, achieving **30ms latency and APDEX 1.0**, extensible for multi-tenant SaaS platforms.

ACHIEVEMENTS & ACTIVITIES

- Solved **300+ algorithmic problems** on [Leetcode](#).
- **Skills Star Award, Accenture** – Honored for leadership in designing highly scalable distributed systems.
- **Technical Blogging** – Authored articles on Java, Spring Framework, microservices architecture, and DevOps.

EDUCATION

Thapar Institute of Engineering and Technology

July 2019 – June 2022

Bachelor of Engineering, Mechatronics

GPA: 7.8
